

Glasses Flashlight Mk. III

Instructions

Construction

Materials

You will need your glasses, electrical tape, and a specific mini flashlight, which you can find on Amazon or AliExpress. To charge it, you will need a USB female-USB male cord.

To build it, you will need a table and a place to sit, as well as adequate lighting.

Putting it all together

The Light

Tape the center of the flashlight to the glasses with a long strip of electrical tape, as shown in the picture. Wrap it tightly, like you're wrapping medical gauze on a wound. Make sure the charging port is facing in a direction where it can have space to attach the female end of the charger.

LEGAL DISCLAIMER

I AM NOT RESPONSIBLE FOR
ANY INJURY, PSYCHOLOGICAL
DAMAGE, AND/OR DEATH
CAUSED BY THE
CONSTRUCTION AND/OR
USAGE OF THE DEVICE
DESCRIBED IN THIS MANUAL.
