

Galatea: Independent Phone Accessory Instructions

Construction

Materials

First, you will need the specific phone. You can get it on AliExpress.

Mini Smart Phone

2GB+16GB

3G WCDMA

3.0" HD Screen

Android system

3G Global

You can get it from other vendors, but make sure it's the same model.

You will also need a wifi connection to access most features. A SIM card and cell connection are not necessary.

For clarity, in the rest of this instruction manual, the phone will be referred as the "mini-phone"

Printing and Usage

Printing

Print all files at 0.8 mm with 10% infill density, using the line pattern. Use supports on the Robot Phone holder, but not on the other models. (The wall thickness and infill pattern are the same as Galatea). The mini-phone should be able to easily slide in and out.

The Robot Accessory

Place in one of Galatea's hands. Make sure the accessory has the GreerTech logo facing forwards, with the phone near the wrist.

Wall Mount

Pin the mount to the wall using push pins. Make sure all holes have pins in them. It has a hole for charging, which is necessary for some prolonged applications.

Desk Mount

Place it on your desk.

Unique Uses

Security Camera

Download a phone security camera app, and place the phone down in it. The Robot Holder and the Wall Mount have holes for a charger for prolonged use.

Motion Tripwire

Download a motion detector app, and place the phone down in it. The Robot Holder and the Wall Mount have holes for a charger for prolonged use.

Phone Calls

Download Google Voice and make a number for yourself.

Video Calls

Install a video call app, such as Signal. Make an account with the Google Voice number. Place the phone on the mount.

Virtual Babysitting/Petsitting

Install a video call app, such as Signal. Make an account with the Google Voice number. Place the phone on the mount, and make a video call between the phone and your phone.* Alternatively, you can have a babysitter/petsitter be supervised by a video call, and check it occasionally. The babysitter/petsitter won't know when you're watching. The Robot Holder and the Wall Mount have holes for a charger for prolonged use.

*This method is suitable for children 12+. Make sure they have a phone to text you and call emergency services. For pets, ensure they have all the supplies they need and bathroom access.

Independent Uses

AI Calls

Put the Backyard AI app on the mini-phone, connect to the bluetooth speaker, and activate call mode.

Music

Connect to the Bluetooth speaker and play music on the mini-phone.

Remote

Install the vacuum controller app on the mini-phone.

Backup Alarm

Put an alarm on the mini-phone. Make sure it has enough power to last the night. The Robot Holder and the Wall Mount have holes for a charger.

Dictation Machine

Record audio to write down later.
